

The 2018 CompassIntel Awards

METHODOLOGY

The Compass Intelligence Awards include those specific to mobile and wireless, IoT and connected solutions, and sustainability. These awards are an annual awards program and include those companies and/or products who offer superior innovation, elite products, best-in-class services, and innovative solutions to advance the Consumer and Enterprise Mobility, Internet of Things/M2M, and Green Technology markets. The awards are selected or voted on by a panel of journalists, editors, and analysts that cover the industry and are collated by the editorial staff of CompassIntel.com, related partners, independent analysts, and those nominated through the online system. The awards are represented by a number of different categories and sub-categories and are based on such things as uniqueness, features, and impact on the industry. There is a three-step process including, and the example below is specific to the A-List in IoT, yet all programs have the same structure:

The criteria used to judge the awards include:

- Vision
- Strategy
- Leadership and Governance
- Organizational Structure and Alignment
- Key Customers
- Partnerships
- Processes
- Openness
- Operational and Financial Metrics
- Other Qualitative Factors

WHO VOTES?

As for our voters, we do not share the names of the voters (we keep it anonymous to our nominees) to keep it fair since they will be voting each year. Each year we have between 20 and 40 participants that include analysts, editors, journalists, and respected influencers/thought leaders.
