

## Compass Intelligence IoT Innovator Awards

### Award Description

#### Award Category

IoT Innovator: Utility & Water Metering

Company showcasing innovative product technology or suite of products/solutions/services that support in industry innovation, advancements in processes or operations, automation in utility and/or water metering.

IoT Innovator: Facilities/Building Management

Company demonstrating innovative product technology or suite of products/solutions/services that support in industry innovation, advancements in processes or operations specific to building management, facilities management, and property management. Solutions may include security, surveillance, HVAC, parking, elevator, access control, and other services.

IoT Innovator: Agriculture & Farming

Company demonstrating innovative product technology or suite of products/solutions/services that support in industry innovation, advancements in processes or operations specific to farming, agriculture, use of farm equipment and tools, and other technologies to support in farming operations.

IoT Innovator: IoT Device Security

Company demonstrating innovative product technology or suite of products/solutions/services that support in superior device security for connected machines, things, and objects. This includes the security and protection of sensors and other connected things.

IoT Innovator: Driverless Vehicles

Company demonstrating innovative product technology or suite of products/solutions/services that support in industry innovation, advancements in processes or operations specific to the roll-out and management of driverless vehicles, self-driving vehicles. These vehicles may be used for both consumer and business purposes.

IoT Innovator: Retail & Customer Experiences

Company demonstrating innovative product technology or suite of products/solutions/services that support in industry innovation, advancements in processes or operations specific to retail services, customer experience enhancements, transaction automation, innovative buying experiences, and other retail advancements.

IoT Innovator: Smart Roads

Company demonstrating innovative product technology or suite of products/solutions/services that support in industry innovation, advancements in processes or operations specific to road development, road construction, road planning, road maintenance, and other roadway applications.

IoT Innovator: Intelligent Transportation

Company demonstrating innovative product technology or suite of products/solutions/services that support in industry innovation, advancements in processes or operations specific to intelligent transportation, intelligent traffic, public transportation, traffic management and routing, commuter routing, and other commuter travel applications.

IoT Innovator: Energy Management

Company demonstrating innovative product technology or suite of products/solutions/services that support in industry innovation, advancements in processes or operations specific to energy management, energy control systems, power management, and sustainable energy practices.

IoT Innovator: Public Safety

Company demonstrating innovative product technology or suite of products/solutions/services that support in industry innovation, advancements in processes or operations specific to public safety services including law enforcement, fire and emergency response, emergency communications, disaster response, and other public safety response applications.

IoT Innovator: Home Automation

Company demonstrating innovative product technology or suite of products/solutions/services that support in industry innovation, advancements in processes or operations specific to home security systems, home monitoring, home connectivity, home automation, and other home management applications.

IoT Innovator: Agriculture Fleet Management

Company demonstrating innovative product technology or suite of products/solutions/services that support in industry innovation, advancements in processes or operations specific to managing farm equipment fleet systems and units.

IoT Innovator: Auto Dealership Management

Company demonstrating innovative product technology or suite of products/solutions/services that support in industry innovation, advancements in processes or operations specific to automotive dealer vehicle fleet system management, including pre-sold and post-sales units.

IoT Innovator: Trucking Fleet Management

Company demonstrating innovative product technology or suite of products/solutions/services that support in industry innovation, advancements in processes or operations specific to trucking fleet management.

IoT Innovator: IoT for Good

Company demonstrating innovative solutions to address global sustainability, energy and utilities conservation, environmental protection, emissions reduction, and other solutions that impact the globe, the planet, and precious resources.

IoT Innovator: Machine Vision Technologies

Company demonstrating innovation around giving back to the community, energy conservation, global sustainability efforts, resource optimization, and protection of the Earth's previous resources.

IoT Innovator: IoT Chipset Technologies

Company demonstrating innovative product technology or suite of products/solutions/services that support in industry innovation, advancements in processes or operations specific to new and innovative IoT chipset design, applications, capabilities, and use cases.

Company demonstrating innovative product technology or suite of products/solutions/services that support in industry innovation, advancements in processes or operations specific to medical device deployment, management, administering, remote monitoring, and other applications.

IoT Innovator: Medical Devices

Company demonstrating innovative product technology or suite of products/solutions/services that support in industry innovation, advancements in processes or operations specific to aviation or airport operations including in-flight and ground services. This may include asset tracking and monitoring, fleet maintenance, fuel management, and other services.

IoT Innovator: Aviation/Airport

Company demonstrating innovative product technology or suite of products/solutions/services that support in industry innovation, advancements in processes or operations specific to college or university operations, advancing student experiences and safety, and other applications.

IoT Innovator: Colleges/Universities
